Kearny NJ

I know I'm the right candidate for this job. I practice everyday the programs of Illustrator, InDesign and Photoshop everyday. I know I am only a sophomore in college and I know I have much to learn. I just know it would be right to learn from professionals such as the VUE magazine of NJ. It would truly be an honor to get hired for this internship. I want to excel in my craft as a Graphic Designer. I design many logos myself and draw a lot of designs. I want my craft to come alive and to be viewed by the public.

My strength are that I'm a creative person. I'm always looking at magazines, television, social media to be up to date of the latest trends. I'm also a very social person and I know how to stand out in the most positive way possible. Another advantage I have is Saint Peters Graphic Design program is small, so we are fortunate enough to do many projects throughout the marking period. With that being said, we have projects every week. Also, having a small team really helps people not to be shy to critique my work. I want to get to the opportunity to work with a bigger group of desginers. Moreover, I am always on social media I know how whats on trend on Instagram, Twitter, and Snapchat.

Highlights of my Skills

- PhotoShop
- InDesign
- Illustrator
- Microsoft word
- PowerPoint
- Microsoft Sheets
- I communicate well with others
- I know how to deal with colors for Online websites (RGB) or for print CMYK
- Packaging Design
- Making Logos, Designs
- Interactive Media and Typography

I want to be better than my upperclassmen and surpass the people in my grade. I know I have what VUE needs. I am working for my BA in Graphic Design and I have recently decided to minor in Communications. You can view my work through my profile.

Sincerely,

Maryvit Luna
